PROFESSIONAL SUMMARY

Results-driven Python Full-Stack Developer designing, developing, and deploying scalable web applications and RESTful APIs. Expertise in architecting decoupled systems using Python (Django, FastAPI), React, PostgreSQL, and cloud infrastructure (GCP, Docker). Proven ability to engineer real-time collaborative workspaces, implement Agile workflows, and automate data pipelines — reducing API response times by up to 30% on production-style platforms.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend & APIs: FastAPI, Django, Django REST Framework, WebSockets, JWT Auth, OAuth2

Frontend: React.js, Redux (State Management), Responsive Web Design, Bootstrap, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite, JSON Parsing, ORM (SQLAlchemy, Django ORM)

Cloud & DevOps: Google Cloud Platform (GCP), Docker, CI/CD Pipelines, GitHub Actions, Linux

TECHNICAL PROJECTS

Nexus DevSecOps Platform Mar 2026

Context: Google 5-Day Intensive Agents Event | **Tech:** Python, FastAPI, React.js, PostgreSQL, Docker, Swagger

- Re-architected a DevSecOps platform from a monolithic Streamlit app into a decoupled React + FastAPI system, cutting page load time by an estimated 40% and enabling independent frontend/backend deployment.
- Engineered robust RESTful endpoints featuring JWT authentication and Swagger API documentation for secure data routing.
- Containerized the application using Docker and configured GitHub Actions CI/CD pipelines for seamless cross-platform deployment and operational compliance.

Real Time Collaborative Code Editor Jan 2026 – Feb 2026

Context: Independent Full-Stack Project | **Tech:** Python, Django Channels, WebSockets, TypeScript, MySQL, Pytest

- Engineered a real-time collaborative workspace using WebSockets and Django Channels, synchronizing live edits across 5+ concurrent clients with <200ms latency.
- Crafted modular, reusable frontend components using TypeScript and React state management for a type-safe, cross-device user experience.
- Designed backend schemas using MySQL and Django ORM alongside Pytest unit testing to manage authentication and persistent session data.

CareerWeave AI Workflow Automation Dec 2025

Context: Google Gen AI APAC Hackathon | **Tech:** Python, Django REST Framework, GCP, SQL, Postman

- Developed high-throughput RESTful API endpoints using Django REST Framework, extensively tested via Postman, to automate dynamic data extraction and transformation.
- Engineered backend parsing scripts integrated with generative AI models to return structured business analytics, processing 1000+ data records smoothly.
- Deployed scalable backend services on GCP, implementing API optimizations and caching that reduced average API response time by 30%.

CERTIFICATIONS

Google Cloud Gen AI Academy APAC Edition (Cohort 1) — Google (Aug 2026)

5-Day Kaggle & Google AI Agent Intensive — Google & Kaggle (Jul 2026)

Prompt Engineering 101 — KodeKloud (May 2026)

Advanced Python Programming — KodeKloud (Apr 2026)

Junior Cybersecurity Analyst — Cisco Networking Academy (Mar 2026)

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering 2022 – 2026

University College of Engineering Kakatiya University, Kothagudem | CGPA: 7.3/10.0
